Material Name: Ferrous Sulfate Heptahydrate

**Section 1 - Chemical Product and Company Identification**

Chemical Name: Ferrous Sulfate Heptahydrate
Product Use: For Commercial Use
Synonyms: Ferrous monosulfate, heptahydrate; Iron (II) sulfate; Copperas
Supplier Information
Chem One Ltd. Phone: (713) 896-9966
14140 Westfair East Drive Fax: (713) 896-7540
Houston, Texas 77041-1104 Emergency # (800) 424-9300 or (703) 527-3887

General Comments: FOR COMMERCIAL USE ONLY; NOT TO BE USED AS A PESTICIDE.

NOTE: Emergency telephone numbers are to be used only in the event of chemical emergencies involving a spill, leak, fire, exposure, or accident involving chemicals. All non-emergency questions should be directed to customer service.

Component Related Regulatory Information
This product may be regulated, have exposure limits or other information identified as the following: Iron Salts (soluble).

Component Information/Information on Non-Hazardous Components
Ferrous Sulfate Heptahydrate is considered hazardous under 29 CFR 1910.1200 (Hazard Communication).

**Section 3 - Hazards Identification**

Emergency Overview
Ferrous Sulfate Heptahydrate is a blue-green, crystalline or granular solid. The primary health hazard associated with exposure to this compound is the potential for irritation of the eyes, skin, nose and other tissues which come in contact with dusts or particulates of Ferrous Sulfate Heptahydrate. Ferrous Sulfate Heptahydrate is not flammable or reactive. Thermal decomposition of Ferrous Sulfate Heptahydrate produces irritating vapors and toxic gases (e.g. sulfur oxide). Emergency responders should wear proper personal protective equipment for the releases to which they are responding.

Hazard Statements
CAUTION! May cause irritation to eyes, skin, respiratory tract and gastrointestinal system. Harmful if swallowed. Chronic Exposure may cause adverse liver effects. Target organs affected from poisoning may include the liver, kidneys, digestive, circulatory, cardiovascular, and central nervous systems. Avoid contact with eyes and skin. Avoid breathing dusts. Wash thoroughly after handling. Keep container closed. Use with adequate ventilation.

Potential Health Effects: Eyes
Exposure to particulates or solution of Ferrous Sulfate Heptahydrate may cause moderate to severe irritation of the eyes with symptoms such as stinging, tearing and redness. Prolonged exposure of the eyes may cause discoloration to the sclera. Prolonged, low level contact with corrosives may result in conjunctivitis.

Potential Health Effects: Skin
Ferrous Sulfate Heptahydrate can cause irritation of the skin, especially after prolonged exposures. Repeated skin contact may lead to dermatitis (red, cracked skin).

Potential Health Effects: Ingestion
Ferrous Sulfate Heptahydrate is harmful if swallowed. Ingestion of concentrated solutions or powder may cause nausea, vomiting, diarrhea, and black stools. Pink to red-brown discoloration of the urine is an indication of iron poisoning. Severe hemorrhagic gastritis with abdominal pain, retching, and violent diarrhea may occur. Circulatory system may be affected with symptoms of shock, rapid, weak or no pulse, and severe hypotension may occur. Smaller doses are much more toxic to children in comparison to adults. Chronic ingestion may result in adverse effects on the liver. Severe or chronic Ferrous Sulfate poisonings may damage blood vessels. Large chronic doses cause rickets in infants.

Potential Health Effects: Inhalation
Breathing dusts or particulates generated by Ferrous Sulfate Heptahydrate can lead to irritation of the nose, throat or respiratory system. Symptoms of such exposure could include coughing and sneezing.

HMIS Ratings: Health Hazard: 2* Fire Hazard: 0 Physical Hazard: 0

- Hazard Scale: 0 = Minimal 1 = Slight 2 = Moderate 3 = Serious 4 = Severe
- * = Chronic hazard
**Section 4 - First Aid Measures**

**First Aid: Eyes**
If product contacts eyes, get immediate medical attention. Immediately rinse affected eye with plenty of water for at least 15 minutes.

**First Aid: Skin**
Remove all contaminated clothing. For skin contact, wash the exposed area extremely thoroughly with soap and water. Seek medical attention if irritation persists. Wash all contaminated clothing before reuse.

**First Aid: Inhalation**
Remove source of contamination or move victim to fresh air. Apply artificial respiration if victim is not breathing. Do not use mouth-to-mouth method if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Administer oxygen if breathing is difficult. Get immediate medical attention.

**First Aid: Ingestion**
DO NOT INDUCE VOMITING, unless directed by medical personnel. Have victim rinse mouth thoroughly with water, if conscious. Never give anything by mouth to a victim who is unconscious or having convulsions. Contact a physician or poison control center immediately.

**First Aid: Notes to Physician**
Provide general supportive measures. Consult nearest Poison Control Center for all exposures except minor instances of inhalation or skin contact.

**Section 5 - Fire Fighting Measures**

**Flash Point:** Not applicable
**Method Used:** Not applicable
**Upper Flammable Limit (UEL):** Not applicable
**Lower Flammable Limit (LEL):** Not applicable
**Auto Ignition:** Not applicable
**Flammability Classification:** Non Combustible

**General Fire Hazards**
Ferrous Sulfate Heptahydrate is not combustible, and does not contribute to the intensity of a fire. When involved in a fire, this material may decompose and produce irritating vapors, acrid smoke and toxic gases.

**Hazardous Combustion Products**
When heated to decomposition, Ferrous Sulfate Heptahydrate may emit toxic fumes of sulfur oxide.

**Extinquishing Media**
Use methods for surrounding fire.

**Fire Fighting Equipment/Instructions**
Firefighters should wear full protective clothing including self-contained breathing apparatus.

**NFPA Ratings: Health:** 1
**Fire:** 0
**Reactivity:** 0
**Other:**
Hazard Scale: 0 = Minimal 1 = Slight 2 = Moderate 3 = Serious 4 = Severe

**Section 6 - Accidental Release Measures**

**Containment Procedures**
Stop the flow of material, if this can be done without risk. Contain the discharged material. If sweeping of a contaminated area is necessary use a dust suppressant agent, which does not react with product (see Section 10 for incompatibility information).

**Clean-Up Procedures**
Wear appropriate protective equipment and clothing during clean-up. Shovel the material into waste container. Thoroughly wash the area after a spill or leak clean-up. Avoid contamination of soil, and prevent spill residue from running to groundwater or storm drains.

**Evacuation Procedures**
Evacuate the area promptly and keep upwind of the spilled material. Isolate the spill area to prevent people from entering. Keep materials that burn away from spilled material. In case of large spills, follow all facility emergency response procedures.

**Special Procedures**
Remove soiled clothing and launder before reuse. Avoid all skin contact with the spilled material. Have emergency equipment readily available.
**Section 7 - Handling and Storage**

**Handling Procedures**
All employees who handle this material should be trained to handle it safely. Do not breathe dust. Avoid all contact with skin and eyes. Use Ferrous Sulfate Heptahydrate only with adequate ventilation. Wash thoroughly after handling.

**Storage Procedures**
Keep container tightly closed when not in use. Store containers in a cool, dry location, away from direct sunlight, sources of intense heat, or where freezing is possible. Material should be stored in secondary containers or in a diked area, as appropriate. Store containers away from incompatible chemicals (see Section 10, Stability and Reactivity). Storage areas should be made of fire-resistant materials. Post warning and “NO SMOKING” signs in storage and use areas, as appropriate. Use corrosion-resistant structural materials, lighting, and ventilation systems in the storage area. Floors should be sealed to prevent absorption of this material. Inspect all incoming containers before storage, to ensure containers are properly labeled and not damaged. Have appropriate extinguishing equipment in the storage area (i.e., sprinkler system, portable fire extinguishers).

Empty containers may contain residual particulates; therefore, empty containers should be handled with care. Do not cut, grind, weld, or drill near this container. Never store food, feed, or drinking water in containers that held Ferrous Sulfate Heptahydrate. Keep this material away from food, drink and animal feed. Do not store this material in open or unlabeled containers. Limit quantity of material stored.

**Section 8 - Exposure Controls / Personal Protection**

**Exposure Guidelines**

A: General Product Information

B: Component Exposure Limits

The exposure limits given are for Iron Salts, soluble as Fe.

- ACGIH: as Fe: 1 mg/m³ TWA (related to Iron salts (soluble))
- OSHA: as Fe: 1 mg/m³ TWA (related to Iron salts (soluble)) [vacated 1989 PEL]
- NIOSH: 1 mg/m³ TWA (related to Iron salts (soluble))

**Engineering Controls**
Use mechanical ventilation such as dilution and local exhaust. Use a corrosion-resistant ventilation system and exhaust directly to the outside. Supply ample air replacement. Provide dust collectors with explosion vents.

**PERSONAL PROTECTIVE EQUIPMENT**
The following information on appropriate Personal Protective Equipment is provided to assist employers in complying with OSHA regulations found in 29 CFR Subpart I (beginning at 1910.132). Please reference applicable regulations and standards for relevant details.

**Personal Protective Equipment: Eyes/Face**
Wear safety glasses with side shields (or goggles) and a face shield. If necessary, refer to U.S. OSHA 29 CFR 1910.133.

**Personal Protective Equipment: Skin**
Where contact is likely, wear chemical resistant gloves, rubber boots, and coveralls. Nitrile gloves are recommended. Gloves should be tested to determine their suitability for prolonged contact with this material. If necessary, refer to U.S. OSHA 29 CFR 1910.138.

**Personal Protective Equipment: Respiratory**
None required where adequate ventilation conditions exist. If airborne concentrations are above the applicable exposure limits, use NIOSH-approved respiratory protection. If respiratory protection is needed, use only protection authorized in the U.S. Federal OSHA Standard (29 CFR 1910.134), applicable U.S. State regulations. Oxygen levels below 19.5% are considered IDLH by OSHA. In such atmospheres, use of a full-facepiece pressure/demand SCBA or a full facepiece, supplied air respirator with auxiliary self-contained air supply is required under OSHA’s Respiratory Protection Standard (1910.134-1998).

**Personal Protective Equipment: General**
Have an eyewash fountain and safety shower available in the work area. Use good hygiene practices when handling this material including changing and laundering work clothing after use. Wash hands thoroughly after handling material. Do not eat, drink, or smoke in work areas.
* * * Section 9 - Physical & Chemical Properties * * *

Physical Properties: Additional Information
The data provided in this section are to be used for product safety handling purposes. Please refer to Product Data Sheets, Certificates of Conformity or Certificates of Analysis for chemical and physical data for determinations of quality and for formulation purposes.

* * * Section 10 - Chemical Stability & Reactivity Information * * *

Chemical Stability
Under normal conditions of temperature and pressure, Ferrous Sulfate Heptahydrate is stable. Ferrous Sulfate Heptahydrate reacts in moist air to form ferric sulfate. Ferrous Sulfate Heptahydrate loses water in dry air and may discolor upon exposure to moist air, forming a brown coating of extremely corrosive, basic ferric sulfate.

Chemical Stability: Conditions to Avoid
Avoid high temperatures, excessive heat and incompatible materials.

Incompatibility
Avoid strong alkalis, soluble carbonates, gold and silver salts, lead acetate, lime water, potassium iodide, potassium, sodium tartrate, sodium borate, and tannin.

Hazardous Decomposition
When heated to decomposition, Ferrous Sulfate Heptahydrate may emit toxic fumes of sulfur oxides.

Hazardous Polymerization
Will not occur.

* * * Section 11 - Toxicological Information * * *

Acute Toxicity
A: General Product Information
May cause eye, skin, nose, throat and respiratory tract irritation. Ingestion of an approximate volume or 5 grams or less can produce drowsiness, irritability, abdominal pain, nausea, vomiting and bloody stools. Delayed symptoms can include fluid in the lungs, liver abnormalities, shock, coma and breakdown of the stomach and intestinal lining. Death has resulted from ingestion of less than an ounce. Smaller doses are much more toxic to children in comparison to adults.

Chronic: Long term skin overexposure to Ferrous Sulfate Heptahydrate may lead to dermatitis (red, itchy skin). Excessive long-term ingestion of Ferrous Sulfate Heptahydrate may damage blood vessels, and cause liver effects. Large chronic doses cause rickets in infants. Prolonged exposure of the eyes may cause discoloration.

B: Component Analysis - LD50/LC50
Ferrous Sulfate Heptahydrate (7782-63-0):
LD₅₀ (Oral-Mouse) 1520 mg/kg; LD₅₀ (Intraperitoneal-Mouse) 245 mg/kg; LD₅₀ (Intravenous-Mouse) 51 mg/kg

B: Component Analysis - TDLo/LDLo
Ferrous Sulfate Heptahydrate (7782-63-0):
LDLo (Oral-Rat) 1389 mg/kg; LDLo (Oral-Rabbit, adult) 2778 mg/kg; LDLo (Rectal-Rat) 697 mg/kg; LDLo (Subcutaneous-Rabbit, adult) 279 mg/kg; LDLo (Intravenous-Rabbit, adult) 99 mg/kg

Carcinogenicity
A: General Product Information
No information available.

B: Component Carcinogenicity
Ferrous Sulfate Heptahydrate is not listed by ACGIH, IARC, OSHA, NIOSH, or NTP.
**Section 11 - Toxicological Information (Continued)**

**Epidemiology**
There is a large body of data on the clinical toxicology of ingested iron salts. There are little data on the health effects from occupational (inhalation or dermal contact) exposures. The recommended exposure limit reduces risk of skin and mucous membrane irritation.

**Neurotoxicity**
No information available.

**Mutagenicity**
Mutation in Microorganisms (Escherichia coli) 30 mmol/L; Micronucleus Test (Mouse Cells-not otherwise specified) 500 μmol/L

**Teratogenicity**
No information available.

**Other Toxicological Information**
No information available.

**Section 12 - Ecological Information**

**Ecotoxicity**
No information available.

**Environmental Fate**
No information available.

**Section 13 - Disposal Considerations**

**US EPA Waste Number & Descriptions**

**A: General Product Information**
As shipped, product is not considered a hazardous waste by the EPA. Wastes from this compound must be tested using methods described in 40 CFR Part 261 to determine if it meets applicable definitions of hazardous wastes.

**B: Component Waste Numbers**
No EPA Waste Numbers are applicable for wastes of Ferrous Sulfate Heptahydrate.

**Disposal Instructions**
Dispose of in accordance with all applicable Federal, State or provincial, and local regulations.

**Section 14 - Transportation Information Ground**

NOTE: The shipping classification information in this section (Section 14) is meant as a guide to the overall classification of the product. However, transportation classifications may be subject to change with changes in package size. Consult shipper requirements under 49 CFR, IATA and IMDG to assure regulatory compliance.

**US DOT 49 CFR 100-185 Revised July 24, 2009 Information**

**UN/NA #:** UN 3077
**Shipping Name:** Environmentally Hazardous Substance, solid, n.o.s. (Ferrous Sulfate)
**Hazard Class:** 9
**Packing Group:** III
**Required Label(s):** Class 9
**RQ Quantity:** For a single package greater than the RQ of 1,000lb (4.54 kg), this product is regulated.
**Special Provision:** IB8, IP2
**Packaging:** 172.240
**International Air Transport Association (IATA)**

For Shipments by Air transport: We classify this product as hazardous (Class 9) when shipped by air because 49 CFR 173.140 (a). “For the purposes of this subchapter, miscellaneous hazardous material (Class 9) means a material which presents a hazard during transportation, but which does not meet the definition of any other hazard class. This class includes: (a)Any material which has an anesthetic, noxious, or other similar property which could cause extreme annoyance or discomfort to a flight crew member so as to prevent the correct performance of assigned duties.”

UN: 3077

**Proper Shipping Name:** Environmentally hazardous substance, solid, n.o.s. (Ferrous Sulfate)

**Hazard Class:** 9

**Packing Group:** III

**Passenger & Cargo Aircraft Packing Instruction:** 911

**Passenger & Cargo Aircraft Maximum Net Quantity:** 400 kg

**Limited Quantity Packing Instruction (Passenger & Cargo Aircraft):** Y911

**Limited Quantity Maximum Net Quantity (Passenger & Cargo Aircraft):** 30 kg

**Special Provisions:** A97 A149

**ERG Code:** 9L

**Limited Quantity Shipments:** Shipments for air must be marked with the Proper Shipping Name, Environmentally hazardous substance, solid, n.o.s. (Ferrous Sulfate), and shall be marked with the UN Number (3077) preceded by the letters "UN", placed within a diamond. The width of the line forming the diamond shall be at least 2 mm; the number shall be at least 6 mm high. The total weight of each outer packaging cannot exceed 30 kg.

**Excepted Quantities:** The maximum quantity of this material per inner receptacle is limited to 30 g per receptacle and the aggregate quantity of this material per completed package does not exceed 1kg. The inner receptacles must be securely packed in an intermediate packaging with cushioning material to prevent movement in the inner receptacles and packed in a strong outer box with a gross mass not to exceed 29kg. The completed package must meet a drop test. The requirements are found in 2.7.6.1. The package must not be opened or otherwise altered until it is no longer in commerce. For air transportation no shipping paper is required. The package must be legibly marked with the following marking:

```
+---+
| * |
| **|
```

**NOTE:** The "**" must be replaced by the primary hazard class, or when assigned, the division of each of the hazardous materials contained in the package. The "***" must be replaced by the name of the shipper or consignee if not shown elsewhere on the package. The symbol shall be not less than 100 mm x 100 mm and must be durable and clearly visible.

**Amendment 34-08 International Maritime Dangerous Goods (IMDG) Code**

For shipments via marine vessel transport, the following classification information applies.

**UN/NA #:** UN 3077

**Proper Shipping Name:** ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S. (Ferrous Sulfate)

**Hazard Class:** Class 9 (Miscellaneous Dangerous Goods)

**Packing Group:** III

**Special Provisions:** 179,274,335,909

**IBC Instructions:** IBC08

**IBC Provisions:** B2

**EmS:** F-A, S-S

**Stowage and Segregation:** Category A

**RQ Quantity:** For a single package greater than the RQ of 1,000lb (4.54 kg), this product is regulated.
US Federal Regulations
A: General Product Information
Components of this product have been checked against the non-confidential TSCA inventory by CAS Registry Number. Components not identified on this non-confidential inventory are either exempt from listing (i.e. polymers, hydrates or salts) or are listed on the confidential inventory as declared by the supplier.

B: Component Analysis
This material contains one or more of the following chemicals required to be identified under SARA Section 302 (40 CFR 355 Appendix A), SARA Section 313 (40 CFR 372.65) and/or CERCLA (40 CFR 302.4):
Ferrous Sulfate (7782-63-0)
CERCLA: Final RQ = 1000 lbs (454 kg)
SARA 302 (EHS TPQ) There are no specific Threshold Planning Quantities for Ferrous Sulfate Heptahydrate. The default Federal MSDS submission and inventory requirement filing threshold of 10,000 lbs. (4,540 kg) therefore applies, per 40 CFR 370.20.

ANSI Labeling (Z129.1):
CAUTION! MAY CAUSE SKIN AND EYE IRRITATION. HARMFUL IF INGESTED OR INHALED. CHRONIC EXPOSURE MAY CAUSE ADVERSE LIVER EFFECTS. Avoid contact with skin, eyes, or clothing. Do not taste or swallow. Avoid breathing dusts and particulates. Use only with adequate ventilation. Wash thoroughly after handling. Wear gloves, goggles, faceshields, suitable body protection, and NIOSH/MSHA-approved respiratory protection, as appropriate. FIRST-AID: In case of contact, immediately flush skin or eyes with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. If inhaled, remove to fresh air. If ingested, do not induce vomiting. Get medical attention. IN CASE OF FIRE: Use water fog, dry chemical, CO₂, or “alcohol” foam. IN CASE OF SPILL: Absorb spill with inert material. Place residue in suitable container. Consult Material Safety Data Sheet for additional information.
